EDITORIAL

Brandt always places people at the heart of its expertise.
That is why we designed adapted appliances, whose only goal is:

Facilitate everyday life.

We have developed simple and ingenious technologies that meet all needs:
whether on a daily basis or on special occasions.

Simply because the Brandt appliances are designed by men.

A historical brand, Brandt is a generalist trademark and is a strong presence in all families of products in the fields of Washing, Cooking, Cooling, Small Appliances.

Since its launch, the Brandt brand mission has been simple: support consumers for their entire lives by providing innovative, useful and relevant products. Making daily life easier by providing adapted equipment is then written into in the brand's DNA. A pioneer of its innovations, Brandt has set itself apart from the competition by being a technological leader with automatic variable ability or automatic laundry detergents dispensing… for example. Whether in the field of Washing, Cooking or Cooling, many of Brandt's products have been at the top of the sales charts and will have continued impact on current and future generations.

LEGACY
Brandt is named after Edgar Brandt, a leading wrought iron craftsman from the beginning of the 20th century. Initially a locksmith and metalwork business, he created famous works, including bronze slab of the Unknown Soldier Monument in 1921, located in the middle of the Arc de Triomphe. The firm made a move into household appliances in the 1950s. This is how the company started to invent its first washing machines, refrigerators and ironing presses. In June 1956, Edgar Brandt offers to the Château de Versailles in Paris, the two beautiful gilded gates of the Great Court of Ambassadors, destroyed during the Revolution.

INNOVATION
Brandt is a ceaseless innovator, aiming to make household appliances accessible to all.

| 1949	1967	1969	1970	1985	1990	2007	2008	2010	2016	2021
First manual top-loading washing machine with agitator.	The top refrigerator brand in France.	The 1st French dishwasher is released from the Brandt factories.	First variable-speed and automatic variable capacity washing.	Launch of the 1st built-in appliances collection.	1st induction hob.	Launch of small appliances. Blenders, kitchen machine, kettles.	Dose-e, first top-loading washing machine with dispenser and built-in detergent measure.	Induction hob MAXIZONE. The 1st 40 x 23 cm. "maximum capacity" cooking area.	Intellect year! This new home appliances generation shows all innovations of the brand since its creation.	Hygiène program removes more than 99.9% of bacteria and viruses, including COVID-19*.

ORIGINE FRANCE

In the world of household appliances, Brandt is the last major player in the Large Household Appliances sector to design and manufacture cooking products in France. Its production is spread across the sites in Orléans (45) and Vendôme (41). The Orléans factory has a Research and Development department, and the After-Sales Service is located near Cergy-Pontoise (95).

Brandt, the labelled French household appliance

An integral part of French culinary heritage, the majority of our cooking appliances have been certified as "Origine France Garantie" since 2011. Conducted by an independent organization, the "Origine France Garantie" certification provides a clear and objective indication of origin. It serves as a marker of quality and excellence, guaranteeing the traceability of household appliances.

SUMMARY

New capacities and technology allowing an optimal washing efficiency

In order to meet everyone needs

Designed to offer the very best in washing and hygiene in all circumstances, with a capacity of up to 18 kg of laundry with equal efficiency, this range offers a palette of innovative programmes adapted to today's lifestyles and the requirements of all textiles.

Induction motor: silence and savings combined

Equipped with a high-performance induction motor and anti-vibration side panels, these washing machines significantly reduce energy consumption and noise levels during cycles.

Tailor-made to your needs*

- **Soiling Level:** washing time, mixing phase, temperature… every parameter of the programmed cycle adapts to the degree of soiling detected, to clean all your laundry as it should be. This option guarantees perfect results, simply by using the right amount of water and energy.
- **Flash programmes:** cleanliness guaranteed!
  Brandt has developed short programmes for washing lightly soiled loads, combining efficiency and time-saving, while consuming energy sparingly.

A healthy environment for your laundry*

- **Easy-Jet function.** Eliminates foam and detergent residues before each rinse by spraying water over the door seal and glass porthole.
- **Drum clean.** This self-cleaning programme sanitizes (without laundry) the entire structure of your machine (drum, tank, pipes, seals) thanks to a high temperature rise to 90 °C.
- **Antibacterial treatment (ABT).** The seal of your washing machine is a particularly sensitive area for the development of bacteria and mold. It is also an important area of contact with your laundry. The treatment it receives protects against these aggressions and ensures washing in a clean and healthy space.

To take care of you and all your laundry!

Targeted efficiency*.

- **Hygiene programme:** developed by Brandt to eliminate the main viruses and up to 99.9% of bacteria through a 30-minute wash phase at a temperature above 60 °C.
- **Antibacterial:** the combined action of a 27-minute steam phase at the start of the cycle eradicates 99.9% of microbes and bacteria deep within the laundry.
- **Steam Option:** the ultimate anti-bacterial treatment, to be programmed on the most frequently used cycles (including Cotton, Mixed and Synthetics and Baby Linen).

The steam released in the drum at the start of the cycle raises the water temperature more rapidly, facilitating the penetration of the detergent into the fibers to ensure thorough cleaning.

Easy-Jet and
Programme Antibacterial 59'

Perfect hygiene for your laundry!

An XXL drum
to lighten your daily load

Choose this washing machine with its automatic variable capacity from 1 to 18 kg. Reduce your daily laundry and generously load the drum, which can accommodate bulky items such as duvets.

Hygiene
(depending on model)

This is the most effective treatment available, developed by Brandt to eliminate the most common viruses and up to 99.9% of bacteria deep down in the laundry at high temperatures*.

- 80 dB(A) spinning
- Dimensions HxWxD (mm) : 850x595x565

Autodose

By adjusting the right amount of detergent and fabric softener to the type, quantity and degree of soiling of your laundry, this function helps protect your clothes, while limiting detergent consumption and pollutant emissions.

Add laundry: the right to forget!

Cycle just started? Don't worry: use this function to top up your load, provided the water level and temperature are not too high.

Induction motor

Combining high performance and quiet operation, it significantly reduces the appliance's energy consumption.

- Dimensions HxWxD (mm) : 845x595x640

Hygiene Protect System

Once the drying cycle is complete, the unit maintains a constant temperature inside the drum for 30 minutes, ensuring effective sterilization of the tank.

Heat Pump

For more efficient and economical results.

This technology is like a condensation dryer, but there Is not resistor heating. The system recovers energy extracted when the humidity of the laundry is condensed, and uses this energy to heat the dry air which is returned to the tumble dryer.

Class A+++

Thanks to the heat pump system, your tumble dryer operates in a closed circuit and optimizes its en-ergy consumption.

Lighting

For added comfort, the inside of the drum lights up automatically when the door is opened. If neces-sary, you can switch it off simply by pressing a dedicated button.

- Noise level: 76 dB(A)
- Dimensions HxWxD (mm) : 850X595X475

Class A++

Thanks to the heat pump system, your tumble dryer operates in a closed circuit and optimizes its en-ergy consumption; in A++ class, you can save up to 60% compared to a B class appliance.

The best compromise !

Washing and drying in 1 hour.

This short cycle is perfect to wash and dry 4 shirts in just 1 hour.

Induction Brushless technology

offers two advantages: less power consumption during cycles and limited noise level.

"My Cycle"

allows you to memorize characteristics of your favorite program (textile, temperature, spin-speed, options) and select it just pressing the button.

FRONT LOADING WASHER DRYER

Brandt, your everyday ally

Save space with a top-opening drum

These Top 40 cm washing machines, with capacities from 6 to 8 kg, offer the very best in washing in all circumstances, with a range of innovative programmes adapted to today's lifestyles. There's a model to suit every need, with all the efficiency and functionality you'd expect from a daily wash.

New Induction motor: silence and savings combined

Equipped with a high-performance induction motor and anti-vibration side panels, energy con-sumption and noise levels during cycles are significantly reduced: advantages that can't be ignored!

To take care of all your laundry!

When the highest standards are required, Brandt innovates.

The Hygiene programme is the most effective treatment available for eliminating the most common viruses and up to 99.9% of bacteria from laundry thanks to a 30-minute wash phase at a constant high temperature.

Degree of soiling: a tailor-made option

Washing time, mixing phase, temperature… each parameter of the programmed cycle adapts to the degree of soiling detected, to clean all your laundry as it should be. This option guarantees perfect results, simply by using the right amount of water and energy.

Rapid 45 min or express 39 min: cleanliness guaranteed at 40 °C!

Brandt has developed these short programmes, combining efficiency, time-saving and low energy con-sumption, for washing lightly soiled loads.

Delay the start of the cycle at your convenience.

Once programmed, your washing machine will start 1 to 24 hours later at a time that suits you best.

Dark colours that stay dark

Whatever the textile, this function preserves the brightness and intensity of dark-coloured textiles wash after wash, thanks to appropriate temperature and brewing.
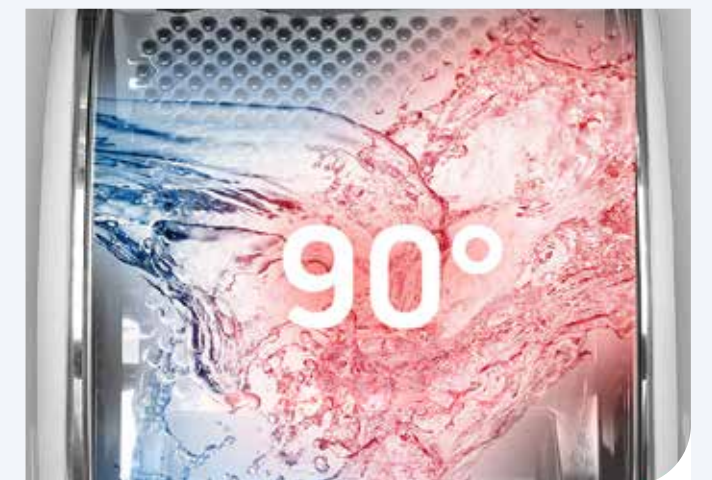

Drum clean: a healthy environment for your laundry

This self-cleaning programme sanitizes (without laundry) the entire structure of your machine (drum, **tank, pipes, seals**) by rapidly raising the temperature to 90 °C, to ensure a clean wash and pre-vent the development of unpleasant odors.

Programmes to suit your needs

Hygiene

This aptly named programme eliminates all major viruses and up to 99.9% of bacteria from your clothes, thanks to a 30-minute wash phase at a constant temperature of over 60° C.

Wool, Baby clothes, Sports,...

These programmes have been designed for garments clothes that require special treatment, combining washing efficiency, optimized rinsing and appropriate spinning.

Drum clean : cleaner clothes in a cleaner washing machine!

This self-cleaning programme sanitizes (without laundry) the entire structure of your machine (drum, tank, pipes, seals) thanks to a high temperature rise to 90 °C.

Soft Opening

This makes it easy to open the drum door and load or unload your laundry.

TOP LOADING WASHING MACHINES

Brandt dishwashers: how could we do without them!

From the smallest compact model with 6 place-settings to 60 cm dishwashers with 15 place-settings, you're sure to find the appliance to meet all your needs. Brandt has designed them with efficiency, ease of use and everyday practicality in mind.

Smart design for optimal storage!

The adjustable lower basket provides intuitive storage for everyday dishes while the upper basket can be adjusted in height, even when loaded. A third, modular, sliding half-drawer basket allows you to optimize your loads according to your needs: finally, you can wash your champagne flutes at the same time as large dishes and saucepans!

LOW POSITION   **HIGH POSITION**

Automatic door opening for drying*.

The drying by natural convection is perfected by a feature which automatically opens to door at the end of the cycle, reduce your energy consumption by 20%.

Tailor-made performance*

To reconcile efficiency and hygiene, savings and time saving, Brandt offers you:

- **AutoProgramme**, the appliance automatically recommends the best suited programme to the degree of soiling detected on your dishes.
- **Hygiene** is a new programme that works at very high temperatures to boost efficiency and eliminate 99.9% of bacteria.
- The **Half Load** or **RapidZone** options, start your cycle without waiting for your dishwasher to be completely full. Simply load your dishes on one of the two baskets only, and select one of the "Upper basket" or "Lower basket" buttons. Save up to 35% in water and energy!
- **Delayed start function** up to 24 hours. Once programmed, your dishwasher will start at a time that suits you best. The digital display shows the remaining time before the start and end of the cycle.

vortex
WASH SYSTEM

Brandt Innovation Optimum wash quality without compromise

The performance of this new technology is unique. Combined with the Intensive, Auto or Glass programmes, it guarantees the highest washing efficiency, while reducing cycle time by a factor of four and saving 20% water and energy (vs. an Eco cycle). An additional arm releases high-pressure water jets from the bottom of the tank. Powerful swirls of water and detergent are diffused into every nook and cranny, reaching dishes wherever they are and removing even the most encrusted traces of food residue.

Optimum performance!

Hygiene is a new programme that works at very high temperatures to boost efficiency and eliminates 99.9% of bacteria.

Automatic door opening for drying

To maximize drying efficiency, it's essential that hot, humid air is evacuated from the dishwasher. That's why Brandt has come up with this new automatic door opening function at the end of the cycle. Simple but extremely useful: your appliance's running time is minimized, energy consumption reduced by 20% for optimal drying results!.

The very best in refrigeration from Brandt!

Vintage design or American version, multi-door, combined, double-door, single-door all-purpose or with 4* freezer, freezer, from XXL size to small 55 cm width,… Brandt refrigeration expresses itself through with a multitude of nuances and a strong commitment to performance, ensuring that every user can find a model suited to their space and consumption preferences.

The Electronics for perfect temperature control…

Depending on whether it is placed outside on the door or inside, the adjustment and control screen displays temperatures precisely regulated to the nearest degree.

Respecting the cold chain!

Refrigerator or Freezer booster automatically lowers the temperature to the lowest degree for faster cooling to preserve the taste of fresh produce, or to ensure fast, deep freezing of food.

The key to energy savings

Eco automatically regulates the ideal temperature in the refrigerator to save up to 20% on your standard energy consumption.

Automatic defrost puts an end to defrosting and cleaning chores. The **No Frost system** prevents the formation of frost inside the freezer, which wastes energy.
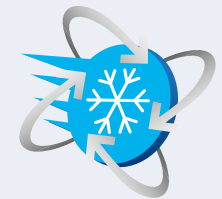

Fast No Frost: optimum preservation

This pulsed dry-cooling system is evenly distributed throughout the entire refrigerator compartment. It allows a rapid return to the correct temperature, twice as fast after the door opening, and preserves your food for up to three times longer.

A functional layout, dedicated spaces

These Brandt appliances feature a well-appointed interior with glass shelves and numerous storage balconnies. Long-lasting, energy-saving LED lighting ensures optimum visibility.

- **Fresh zone.** This compartment, located in the refrigerator's coldest zone (-3 °C), is ideal for pre-serving or defrosting delicate foods such as meat or fish, and even for rapidly refreshing drinks.

- **Flex Zone.** This convertible drawer lets you switch from a Fresh Zone to a warmer zone to preserve fruit and vegetables for longer.

Electronics for perfect cold control

The cold is the undisputed master, revealing its advantages behind the elegant door of the refrigerator, on the temperature control screen managed with extreme precision. The Eco function enables the fridge to automatically regulate the ideal temperature, saving up to 20% on standard energy consumption.

No Frost: performance and savings combined!

There's nothing vintage about this technology (excluding single-door units), which ensures even temperature distribution inside the fridge, keeping food fresh up to three times longer. By preventing the formation of frost inside the freezer, which wastes energy, it also puts an end to cleaning chores!

A retro design with an assertive style

Discover these new double-door and single-door combinations. Volume and curves in Mat black, Glossy beige or Glossy red, wide chrome handles… this collection with its vintage look is an elegant addition to any con-temporary space.

While their aesthetics are inspired by the 60s to delight nostalgic fans of the era and those with a passion for trendy design, their performance matches today's lifestyles and requirements in terms of preservation and freezing.

New BVC8661NA combined refrigerator: Vintage style, modern performance…

Mat black becomes colour! Its chic design won't leave you speechless, and neither will its ability to ensure optimal preservation and freezing conditions for all your foodstuffs!

- Two large compartments with a total volume of 329 litres, electronically controlled for perfect cold control.
- LED lighting and a functional layout with numerous glass shelves and compartments to easily meet the needs of a large family!
- Easy to maintain and highly economical thanks to the Total No Frost System and automatic defrosting.

Designed to preserve your food

The ingenious features and layouts of these food-care appliances ensure optimum conditions for all your foodstuffs, while making your life easier!

- **Fast No Frost technology**
  This pulsed dry-cooling system featured on the BFC2065NA and BFC9560EX models is evenly distributed throughout the refrigerator compartment. It returns to the right temperature twice as quickly after opening the door, preserves your food up to three times longer and puts an end to the chore of defrosting.

- **Refrigerator and freezer boosters**
  Once activated, these functions lower the interior tempe-rature in no time at all, to help maintain the cold chain.

- **Fresh Zone**
  Located in the coldest zone of the refrigerator (model BFC9560EX), this drawer enables delicate foods such as meat or fish to be stored or even defrost-ed at an ideal temperature.

- **Flexi Zone**
  Thanks to this convertible drawer, the BFC2065NA adapts to your needs: switch from a Fresh Zone to a tempered zone to keep your vegetables and early produce fresh longer!

REFRIGERATORS

All the efficiency of Fast No Frost!

This pulsed dry-cooling system is evenly distributed throughout each compartment.

Inside the fridge, it returns to the ideal temperature twice as fast after opening the door, and preserves food up to three times longer.

It prevents the formation of frost inside the freezer, a cause of energy loss.

High storage capacity in a small width

If you're short of space in your kitchen but need both a refrigerator and a freezer with drawers, and both No Frost, then this 55 cm-wide combi unit is for you!

The ultimate family refrigerator!

Its generous 80 cm width perfectly meets the needs of the whole family, and a generous storage capacity of over **520 litres.**

Thanks to the **Total Fast No Frost** system, food stays fresh in your fridge up to three times longer. As for the freezer, no more frost formation and no more cleaning chores. Defrosting is automatic!

Thanks to its front-mounted **control screen and electronic temperature management,** this new double-door offers intelligent features to boost performance and maintain the cold chain.

Design and performance!

Also available in a 70 cm wide version, this Total Fast No Frost double-door is highly efficient and generous in the way it stores and freezes over 400 litres of food. Ideal for eliminating the need to shop every 2 days!

Front LCD display

Temperature control and savings: everything stays under control without having to open the fridge door regularly.

Nearly 200 litres Total No Frost!

This pulsed dry-cooling system is evenly distributed throughout the entire refrigerator compartment.

It returns to the right temperature twice as quickly after opening the door, and preserves food up to three times longer.

It prevents the formation of frost inside the freezer, which wastes energy.

Refrigerator or Freezer boosters

Two well-designed functions to lower the temperature in no time, so you can maintain the cold chain for your fresh foods and freeze large cuts of meat faster.

REFRIGERATORS

Performance and functionality!

Available in 70 cm or 60 cm widths, these upright freezers are ideal for storing all your food in optimal conditions:

- **Electronic temperature** control with LCD display on front panel.
- **No Frost system** to prevent the formation of frost, a source of energy loss.
- **Automatic defrost** to put an end to the chore of cleaning.
- Functional layout featuring numerous trays and drawers with a **high-freezing capacity of 8 to 12 kg** in 24 hours.

Ingenious features to suit your needs

- **Flex function (BFU971YNX)**
  The temperature of this compartment can be adjusted from -24 °C to 5 °C. This means you can use it as a refrigerator or freezer compartment, depending on your needs.

- **Eco Function (BFU862YNA)**
  Automatically regulates the ideal freezer temperature to save up to 20% on your standard energy consumption.

Safety measures to protect your food.

A visual and audible temperature alarm on the BFU8620NA freezer alerts you when the appliance detects an anomaly.
A beep sounds if the door is left open for too long, which could lead to a change in ambient temperature.
In the event of a power cut, don't worry. The freezer has an autonomy of almost 10 hours to preserve your food.

Ingenious Twist Ice

The BFU8620NA offers a simple and practical accessory for making and storing ice cubes! Simply remove the Twist Ice from its easily accessible holder and pour in water to make your ice cubes.

FREEZERS

BFU4521EW WHITE

- 155 litres
- E Class
- No Frost
- Climate class T
- Consumption: 205kWh/year
- Dimensions (H x W x D cm) : 1434X550X550
- Function: Booster freezer
- Sound temperature alarm
- Open door alarm
- 4 drawers
- 1 shelf
- Freezer autonomy 9.8 h
- Freezing capacity 8 kg/24h

Freezer Booster: to maintain the cold chain!

Particularly useful when you're back from shopping, this function lowers the freezer temperature in a very short space of time, ensuring that food freezes quickly and thoroughly.

No Frost. Dry cold ideally distributed.

No more chore of defrosting and cleaning. The No Frost system prevents energy-wasting frost from forming inside the freezer.

Climate class ST or T

Rely on the climate class to find out whether your appliance will be able to operate in optimal conditions, depending on the region or country in which you live: ST for ambient temperatures between 16° and 38 °C, T between 16° and 43 °C.

BFU4251EW WHITE

- 168 litres
- E Class
- Static
- Climate class ST
- Consumption: 190kWh/year

- Freezing capacity 12 kg/24h

FREEZERS

A freezer under control

The LED control panel gives you easy access to the various functions and settings.

- With **Flex function**, you can use your appliance as a refrigerator or freezer. Modulate the temperature to suit your needs and the nature of your food. In refrigeration mode, the setting range is between 2° and 6°C, in freezer mode between -14° and -25 °C. A system for locking and unlocking these controls activates automatically.

- A **Freezer booster** mode lets you lower the temperature of the freezer when you return from shopping, for example, to ensure that food freezes quickly and thoroughly. This mode will automatically deactivate after 52 hours and return to the initial set temperature.

Safe door system

A sliding glass door system allows you to see the contents of your deep-freeze stocks without losing cold.

Climate class SN-T

Thanks to the extended tropical climate class, your device can operate in environments between +10° and 43 °C.

The best performance on the market!

Class	Ambient temperature
SN	This refrigeration appliance is intended for use at ambient temperatures **between 10 °C and 32°C**.
SN-ST	This refrigeration appliance is intended for use at ambient temperatures **between 10 °C and 38 °C.**
SN-T	This refrigeration appliance is intended for use at ambient temperatures **between 10 °C and 43 °C.**
N	This refrigeration appliance is intended for use at ambient temperatures **between 16°C and 32°C.**
ST	This refrigeration appliance is intended for use at ambient temperatures **between 16°C and 38 °C.**
T	This refrigeration appliance is intended for use at ambient temperatures **between 16°C and 43 °C.**

- 1 drawer
- Freezer autonomy 13 h
- Freezing capacity 8 kg/24h

The Option switch

This function adapts to your storage needs, allowing you to transform your freezer space into a refrigerator.

Ideal as a back-up freezer

If you don't like to be caught unprepared, the **BFK099EBW** is a small 100-litre freezer that will easily fit into your garage or balcony, to complement your kitchen fridge-freezer.

Respecting the cold chain

The **Freeze booster function,** activated when you return from shopping for example, guarantees rapid deep-freezing for large cuts of meat.

The BFK099EBW model features a **visual temperature alarm** that goes off when the appliance detects an anomaly.

FREEZERS

Brandt comes to your table!

Brandt presents its new wine cellars, offering you the pleasure of serving and sharing one of your best bottles, albeit in moderation, at your table with family and friends.
The contemporary design of these wine cellars combines performance features that enable you to store and enjoy your wines at the ideal temperature.
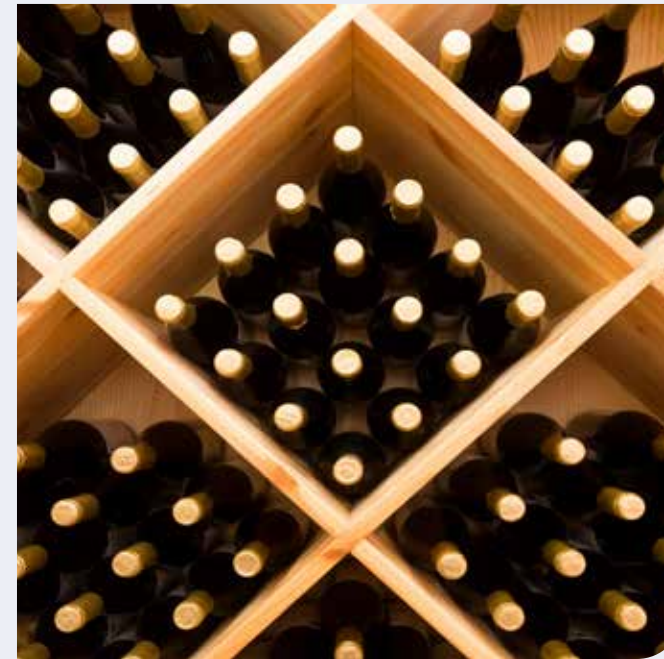

To preserve every great vintage in optimum conditions

These wine cellars are particularly distinguished by their compartment fitted with wooden shelves for storing up to 105 bottles, depending on the model, and inside which the appropriate temperature is electronically managed and controlled for greater precision; LED lighting provides perfect visibility for identifying each bottle stored.

A great deal of attention has been paid to their technological design:

- **Anti-UV glass holder** that filters out the ultraviolet rays that can cause irreversible oxidation of the tannins.

- **Anti-vibration system.** The motor mounted on a Silent Bloc protects the wine from any vibrations that could alter its appearance and taste when the deposit is mixed.

- **Temperature alarm.** When the temperature in the cellar does not match the selected temperature, or if the difference is plus or minus 5 degrees, an alarm sounds to let you know.

WINE CELLARS

BFW105GB BLACK

- Up to 105 bottles
- Glass door treated anti-UV
- Anti-vibration system
- Electronic temperature management
- Temperature alarm
- Wood shelves
- Temperature display
- Inside lighting
- Dimensions HxWxD (mm): 1285x480x575

Technological design

This 201-litres wine cellar can hold up to 105 bottles. Tinted glass and LED lighting ensure perfect visibility of your bottles, while protecting them from direct light and UV rays.

Its anti-vibration system, a guarantee of greater silence, protects your wine and enables it to mature in optimal conditions.

BFW56GB BLACK

- Up to 56 bottles
- Glass door treated anti-UV
- Anti-vibration system
- Electronic temperature management
- Temperature alarm
- Wood shelves
- Temperature display
- Inside lighting
- Dimensions HxWxD (mm): 855x480x575

Enhance your wine tasting experience!

The wine you serve will be at a precise serving temperature, pre-set by the electronic display between 5° and 20 °C.

BFW31FB BLACK

- Up to 31 bottles
- Anti-vibration system
- Electronic temperature management
- Temperature alarm
- Wood shelves
- Temperature display
- Inside lighting
- Dimensions HxWxD (mm): 870x480x430
